

ESOBAP-32 – Prepare Release Documentation

1. Purpose

Overview

The purpose of this user story is to prepare the release documentation for the Enterprise Sales Operations & Business Analysis Platform. The release documentation summarizes the functionality delivered, confirms testing completion, outlines deployment readiness, and provides stakeholders with a comprehensive overview of the solution before production deployment.

This documentation ensures that all project deliverables are reviewed, approved, and available for future reference.

2. Business Requirement

Business stakeholders require standardized release documentation that summarizes the delivered Business Intelligence solution and confirms that all project activities have been successfully completed prior to production deployment.

The release documentation should:

- Summarize completed project features.
 - Confirm testing completion.
 - Record the software version.
 - Document deployment readiness.
 - Provide stakeholders with release information.
 - Support future maintenance and knowledge transfer.
-

3. Business Problem

Without standardized release documentation, stakeholders may have limited visibility into the delivered functionality, testing outcomes, deployment status, and project completion. This can increase project risk, reduce transparency, and make future maintenance more difficult.

4. Solution Overview

A comprehensive release document was prepared to summarize the Business Intelligence solution, including dashboard functionality, testing outcomes, deployment readiness, and project deliverables.

The document provides stakeholders with a single source of information describing the completed solution and confirms that the project is ready for production deployment.

5. Release Scope

The release includes the following Business Intelligence components:

Component	Status
Executive KPI Dashboard	Included
Sales Performance Dashboard	Included
Product Performance Dashboard	Included
Regional Performance Analysis	Included
Profitability Analysis	Included
Functional Testing	Completed
User Acceptance Testing	Completed
Dashboard Enhancements	Completed

6. Release Dashboard Screenshots

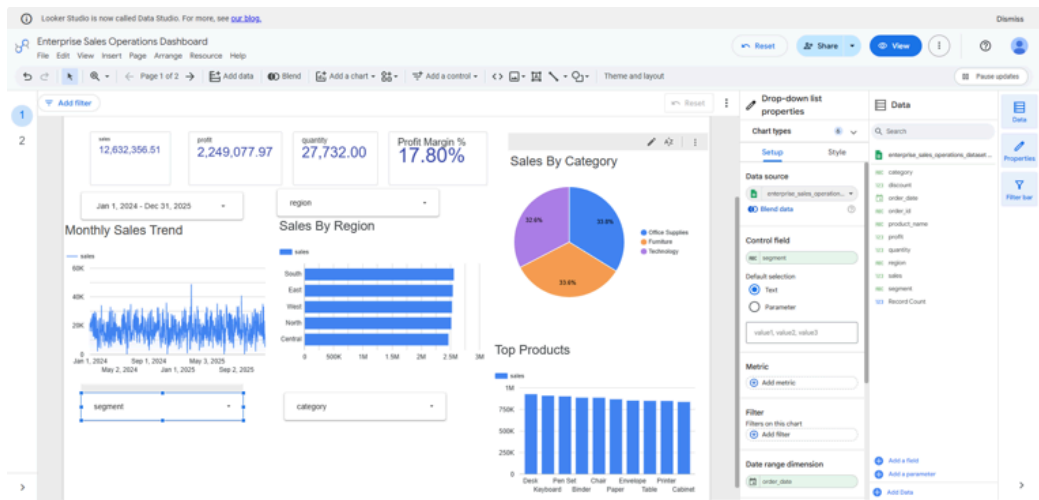

Figure 5.4 – Executive KPI Dashboard

Figure Description

Figure 5.4 presents the Executive KPI Dashboard included in Release 1.0. The dashboard provides executives with a consolidated view of key business performance indicators, including Total Sales, Total Profit, Total Quantity Sold, Average Discount, and Profit Margin. Interactive visualizations support high-level business monitoring and strategic decision-making.

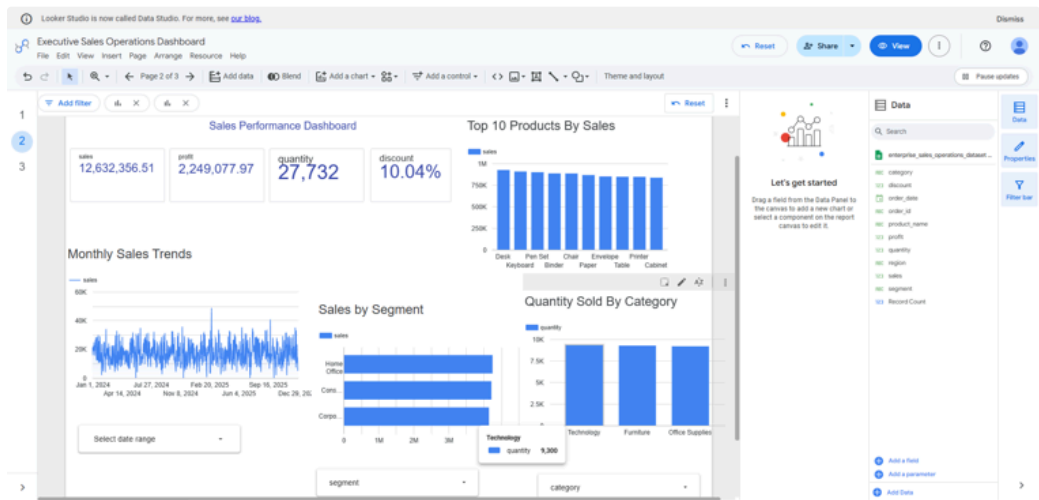

Figure 5.5 – Sales Performance Dashboard

Figure Description

Figure 5.5 presents the Sales Performance Dashboard delivered as part of Release 1.0. The dashboard enables users to analyze monthly sales trends, sales by segment, top-performing products, and quantity sold by category using interactive filters and KPI scorecards.

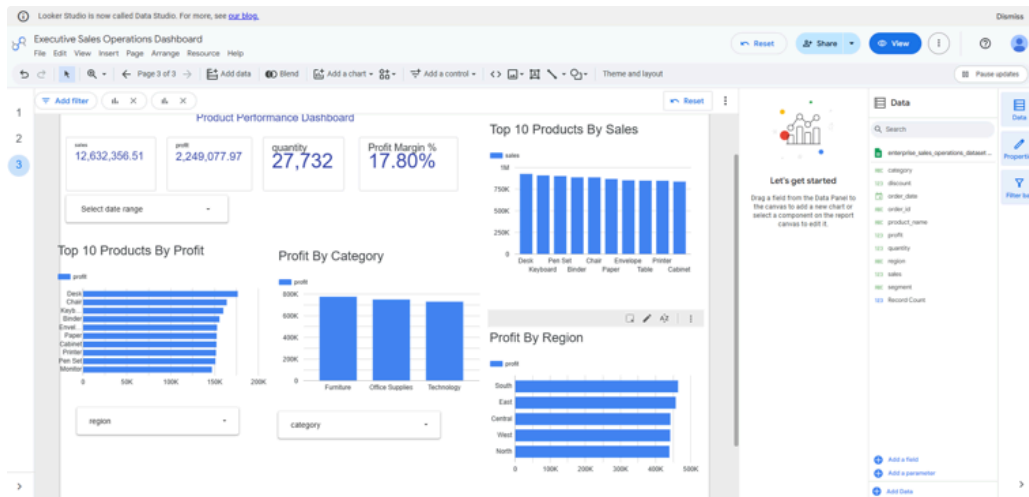

Figure 5.6 – Product Performance Dashboard

Figure Description

Figure 5.6 presents the Product Performance Dashboard included in Release 1.0. The dashboard provides detailed insights into product sales, profitability, regional performance, and category analysis. Interactive filters and metric selection capabilities support comprehensive product performance evaluation.

7. Release Summary

Item	Details
Release Version	Version 1.0
Release Type	Initial Production Release
Project	Enterprise Sales Operations & Business Analysis Platform
Reporting Platform	Google Looker Studio
Database	MySQL
Documentation Platform	Confluence
Project Management	Jira

8. Release Contents

The Version 1.0 release includes:

- Executive KPI Dashboard
 - Sales Performance Dashboard
 - Product Performance Dashboard
 - Interactive Filters
 - KPI Scorecards
 - Regional Performance Analysis
 - Profitability Analysis
 - SQL Validation
 - Functional Testing
 - User Acceptance Testing
 - Dashboard Enhancements
 - Project Documentation
-

9. Release Readiness Checklist

Activity	Status
Dashboard Development Completed	✓ Completed
SQL Validation Completed	✓ Completed
Functional Testing Completed	✓ Completed
User Acceptance Testing Completed	✓ Completed
Defects Resolved	✓ Completed
Documentation Completed	✓ Completed
Deployment Approved	✓ Ready

10. Business Value

The release documentation provides stakeholders with a complete summary of the delivered Business Intelligence solution and confirms that all project objectives have been successfully

achieved. It establishes a formal record of the release and supports future maintenance, knowledge transfer, and solution governance.

11. Validation

The release package was reviewed to ensure:

- All planned Sprint deliverables were completed.
 - Business requirements were satisfied.
 - Testing activities were successfully completed.
 - Documentation was finalized.
 - The solution was approved for production deployment.
-

12. Recommendations

- Schedule periodic reviews of dashboard performance.
 - Monitor business feedback after deployment.
 - Plan future dashboard enhancements for Version 2.0.
 - Implement automated data refresh and monitoring.
 - Expand analytical capabilities based on evolving business requirements.
-

13. Deliverables

- Release Notes
 - Release Summary
 - Deployment Readiness Checklist
 - Final Project Documentation
 - Dashboard Portfolio
 - Version 1.0 Release Package
-

14. Approval Status

Item	Status
Release Documentation	 Completed

Testing Approved	☒ Completed
Business Approval	☒ Received
Deployment Approved	☒ Approved
Ready for Production	☒ Yes
