Project	Enterprise Sales Operations & Business Analysis Platform

1. Purpose

The purpose of this document is to define the business and project objectives that guide the development of the Enterprise Sales Operations & Business Analysis Platform. These objectives provide a clear direction for project activities and establish measurable outcomes that support business decision-making and operational reporting improvements.

2. Business Objectives

ID	Business Objective
BO-01	Improve operational reporting efficiency
BO-02	Standardize KPI calculations
BO-03	Centralize reporting processes
BO-04	Improve product performance visibility

BO-05	Support faster business decision-making
BO-06	Reduce manual reporting effort

3. Project Objectives

- Develop a centralized SQL-based reporting solution.
- Build interactive KPI dashboards using Looker Studio.
- Standardized operational sales reporting.
- Improve reporting consistency and accuracy.
- Maintain project documentation in Confluence.
- Manage Agile activities using Jira.
- Demonstrate Business Analysis best practices.

4. Success Criteria

ID	Success Criteria
SC-01	KPI calculations are accurate and validated
SC-02	Dashboards display current operational metrics
SC-03	Business requirements are fully documented
SC-04	Reporting process is standardized
SC-05	Project documentation is complete
SC-06	Stakeholders can access meaningful business insights

5. Expected Business Outcomes

- Improved operational visibility.

- Reduced reporting preparation time.
 - Better product performance monitoring.
 - Faster KPI reporting.
 - Increased confidence in business reports.
 - Improved stakeholder decision-making.
-
